

## CONTENTS TO VOLUME 46

<b>Computational physics</b>	<i>Issue</i>	<i>Page</i>
Shoucri, M., P. Bertrand, M.R. Feix and B. Izrar The application of shape preserving splines for the modified Korteweg-de Vries equation	1	1
Goto, F. and H.C. Bolton Use and accuracy of the Richardson deferred approach to the limit	1	7
Barkai, D., M. Campostrini, K.J.M. Moriarty and C. Rebbi Applications development on the ETA-10	1	13
Cisneros, A. A communications system for irregular local interaction problems on a concurrent computer	1	35
Sauter, O., K. Appert, L. Villard and J. Vaclavik Numerical modelling of the cold ion-ion hybrid resonance	2	205
Vogelsang, R. and C. Hoheisel A Monte Carlo FORTRAN 200 programme for the determination of static properties of liquids vectorized to run on the Cyber 205 vector processing computer	2	209
Shoucri, M., V. Fuchs and A. Bers The application of the finite element library TWODEPEP for the numerical solution of the relativistic Fokker-Planck equation	3	337
Berg, B.A. and A. Devoto Correlation functions from probability densities	3	345
Huard, A., P. Laigle, V. Mastrangelo, M. Talbi and S. Xhemalce A method based on a stochastic approach for space dependent nuclear reactor kinetics in one dimension	3	351
<b>Computer programs in physics</b>		
Bengtsson, H.-U. and T. Sjöstrand The Lund Monte Carlo for hadronic processes - PYTHIA version 4.8	1	43
Scott, N.S., P. Milligan and H.W.C. Riley The parallel computation of Racah coefficients using transputers	1	83
Tennyson, J. and N. Chandra PEAD - for the calculation of photoelectron angular distributions of linear molecules	1	99
Saraph, H.E. PHOTUC: oscillator strengths and photoionization cross sections from close coupling wave functions	1	107

Computer programs in physics (continued)	Issue	Page
Saldin, D.K. and J.B. Pendry Calculation of the renormalised electron scattering matrix of a molecule adsorbed on a crystal surface	1	129
Reid, J.S. Harmonic Debye-Waller factors for cubic materials	1	141
Basrak, Z. A routine for parameter optimization using an accelerated grid-search method	1	149
Basrak, Z. A computer program for determining the complete reaction amplitude for two-body nuclear reactions involving zero-spin particles	1	155
Basrak, Z. Determination of the physical scattering matrix from a complete set of ambiguous solutions of the scattering problem by using the shortest-path method	1	179
Dasso, C.H. and S. Landowne CCFUS – a simplified coupled-channel code for calculation of fusion cross sections in heavy-ion reactions	1	187
Luce, R.J. and F. Tabakin Adaptation of Coulomb plus strong interaction bound states – momentum space solutions: automatic gridpoint method	1	193
Ingelman, G. TWISTER – a Monte Carlo for QCD high- $p_T$ scattering	2	217
Ingelman, G. and A. Weigend LUCIFER – a Monte Carlo for high- $p_T$ photoproduction	2	241
Öpik, U. A program to set up systems of orthogonal polynomials	2	263
Rand, D.W., P. Winternitz and H. Zassenhaus PASCAL programs for identification of Lie algebras. Part 2: SPLIT – a program to decompose parameter-free and parameter-dependent Lie algebras into direct sums	2	297
Rand, D.W. PASCAL programs for identification of Lie algebras. Part 3: Levi decomposition and canonical basis	2	311
Waite, J. Routines for numerical interpolation, with 1st and 2nd order differentiation, having non-uniformly spaced points, out to 3 dimensions	2	323
Cwiok, S., J. Dudek, W. Nazarewicz, J. Skalski and T. Werner Single-particle energies, wave functions, quadrupole moments and $g$ -factors in an axially deformed Woods-Saxon potential with applications to the two-centre-type nuclear problems	3	379
Evangelakis, G.A., J.P. Rizos, I.E. Lagaris and I.N. Demetropoulos MERLIN – a portable system for multidimensional minimization	3	401

<b>Computer programs in physics (continued)</b>	<i>Issue</i>	<i>Page</i>
Novak, M.M. A program to evaluate vibrationally inelastic collisional cross sections of atom-diatom systems	3	417
Salvat, F. Algorithms for random sampling from single-variate distributions	3	427
Shally, R. Constrained nonlinear least squares fitting	3	437
Dagher, M. and H. Kobeissi DIRIGE - a program for calculating eigenvalues and initial values of log derivative eigenfunctions for a diatomic molecule	3	445
Fincham, D. Book review	1	203
Start, D.F.H. Book review	3	453
Announcement	2	336
